

On the Eigen-values of Certain Hermitian Forms

M. KAC, W. L. MURDOCK, & G. SZEGÖ.

Cornell University, Ithaca, New York; General Electric Company and International Business Machines Corporation,
Syracuse, New York; Stanford University, California

Chapter I. INTRODUCTION	
1.1. Definition of L -forms.....	768
1.2. Hermitian forms.....	768
1.3. Toeplitz forms.....	769
1.4. Relation to orthogonal polynomials.....	769
1.5. Eigen-values of Toeplitz forms.....	770
1.6. Content of the present paper.....	771
1.7. Probabilistic background and conjectures.....	772
Chapter II. ON CERTAIN GENERALIZATIONS OF TOEPLITZ MATRICES	
2.1. Theorem.....	775
2.2. Special cases.....	776
2.3. Remarks.....	776
2.4. Proof of the theorem.....	777
2.5. Continuation of the proof.....	778
2.6. A special case.....	779
Chapter III. EXTREME EIGEN-VALUES OF TOEPLITZ FORMS	
3.1. Special cases.....	783
3.2. A class of functions $f(\theta)$	785
3.3. Preparations.....	786
3.4. Lower approximation.....	788
3.5. Upper approximation.....	788
3.6. Another lower approximation.....	791
3.7. Another class of functions $f(\theta)$	791
Chapter IV. ON THE EIGEN-VALUES OF CERTAIN INTEGRAL EQUATIONS	
4.1. Statement of the main result.....	794
4.2. Proof of the theorem.....	795
4.3. An application to the zeros of Bessel functions.....	797
4.4. A special case.....	799
