

*The General Temporally Discrete Markoff Process**

EBERHARD HOPF

Graduate Institute for Applied Mathematics, Indiana University, Bloomington, Indiana

CONTENTS

1. Introduction	14
2. Operator characterization of general Markoff processes.	16
3. Iteration of a Markoff operator.	20
4. The dual L of a Markoff operator.	22
5. Density operators L^* of a Markoff process	24
6. Extreme case of a point transformation.	25
7. The maximal ergodic theorem for Markoff operators Λ and L^*	27
8. Conservative and dissipative part of a general Markoff process	32
9. The conservative part CX . Invariant functions and sets	35
10. On the ergodic theorem. Markoff processes with an invariant distribution.	39
11. On the influence of the dissipative part	42
References	45
