

*The Elementary Basic Principles of the Unified
Theory of Relativity. C, Introduction**

VÁCLAV HLAVATÝ

Graduate Institute for Applied Mathematics, Indiana University, Bloomington, Indiana

Dedicated to Professor J. A. SCHOUTEN on his 70th birthday

CONTENTS

Chapter I.

	Page
1. Auxiliary results	105
2. Indicators $\mathfrak{E}^{\omega\mu\lambda\nu}$ and $\mathfrak{e}_{\omega\mu\lambda\nu}$	108
3. The field $F_{\lambda\mu}$	110
4. The field $m_{\lambda\nu}$	112
5. Continuation	116
6. Curvature tensor	117
7. Continuation	120
8. A particular case of the field $k_{\lambda\mu}$	121
9. Compatibility problem	123

Chapter II.

1. Introduction	128
2. Conformal change of $g_{\lambda\mu}$	129
3. The most general solution $g_{\lambda\mu}$ of (1.4)	132
4. The most general solution $\Gamma_{\lambda\mu}^{\nu}$ of (1.5)	133
5. Continuation	138
6. The most general solution of (1.4) and (1.5)	140
7. Particular cases	143

* Prepared under joint contract with the Office of Naval Research and the Army Office of Ordnance Research.
