

*The Elementary Basic Principles of the Unified  
Theory of Relativity. C<sub>3</sub>: Applications II\**

VÁCLAV HLAVATÝ

Graduate Institute for Applied Mathematics, Indiana University, Bloomington, Indiana

CONTENTS

	Page
Introduction . . . . .	647
Chapter I	
1. The field $h_{\lambda\mu}$ . . . . .	651
2. The field $M_{\lambda\mu}$ . . . . .	654
3. The field $\mathfrak{B}^{\nu}$ . . . . .	655
Chapter II	
1. Maxwell's equations <i>in vacuo</i> . . . . .	658
2. The electromagnetic field $M_{\mu\lambda}$ . . . . .	659
3. The gravitational field $h_{\lambda\mu}$ . . . . .	662
Chapter III	
1. First set of Maxwell equations . . . . .	666
2. The skew-symmetric part of (0.2) . . . . .	667
3. Auxiliary results . . . . .	669
4. The electromagnetic field and its Maxwell equations . . . . .	671
5. The gravitational field $h_{\lambda\mu}$ . . . . .	672
6. Mass density . . . . .	674
7. Motion . . . . .	676
8. Another approach . . . . .	677
9. The scalar $\sigma$ . . . . .	678
