

*On the Continuity of the Solid and Fluid States**

WALTER NOLL†

Graduate Institute for Applied Mathematics, Indiana University, Bloomington, Indiana

Meinem Freund und Lehrer Herrn RUDOLF HOHENSEE gewidmet

Communicated by C. TRUESDELL

TABLE OF CONTENTS

A.	Introduction	5
B.	Notation	8
C.	Mathematical preliminaries	9
I. BASIC CONCEPTS OF CONTINUUM MECHANICS		
1.	Definition of a continuous medium	12
2.	Kinematics	13
3.	Principles of mechanics	16
4.	Invariance requirements for constitutive equations	17

* This paper, which is the author's doctoral dissertation, was prepared under joint contract from the Office of Naval Research and the Army Office of Ordnance Research to Indiana University. The author is very much indebted to Professor CLIFFORD TRUESDELL for the stimulation which led to this research and for his invaluable assistance in the preparation of this paper. The author is grateful also to Dr. J. ERICKSEN for critical remarks on topics considered here.

† Present address: Technische Universität Berlin-Charlottenburg, Germany.
