

*The Elementary Basic Principles of the Unified
Theory of Relativity. B₃**

VÁCLAV HLAVATÝ

Graduate Institute for Mathematics and Mechanics, Indiana University, Bloomington, Indiana

CONTENTS

	Page
Introduction.....	654
I. The tensor $N_{\lambda\mu}{}^{\nu}$	
1. Prerequisites.....	655
2. The tensor $N_{\lambda\mu}{}^{\nu}$	659
3. The tensors $N_{\lambda\mu}{}^{\nu}$ and $S_{\lambda\mu}{}^{\nu}$	661
4. The identities.....	662
5. The vector S_{λ}	664
6. Product space.....	665
II. Degenerate cases	
7. First Class.....	668
8. First Class: Continuation.....	672
9. Second Class: The First Case.....	673
10. Second Class: The Second Case.....	675
