

# *Subharmonic and Ultraharmonic Solutions for Weakly Non-linear Systems*

ROBERT A. GAMBILL & JACK K. HALE

*Communicated by IRMGARD FLÜGGE-LOTZ*

## CONTENTS

Introduction . . . . .	354
§1. Description of the method and proof of convergence . . . . .	356
§2. Existence of periodic solutions . . . . .	360
§3. Variations of the method . . . . .	362
§4. Further considerations for real systems . . . . .	365
§5. Cases when the Jacobian is identically zero . . . . .	369
§6. The Duffing and Mathieu equations . . . . .	376
§7. Liénard type equation with a forcing term . . . . .	383
§8. The Reuter equation . . . . .	387
§9. Applications to systems . . . . .	389
§10. Remarks on autonomous systems . . . . .	392
Bibliography . . . . .	393
